

## November 6 2019 IC Strategic Planning Workshop - Outcomes and Next Steps

Blueprint Action #	Staff Priority	Workshop Outcomes/Recommendations	Outcome Category	Recommended Next Steps
4	Low	-For current progress reporting, link to new science and highlight as success -For next Blueprint update, look at current science on what makes good transition zones	Improve Reporting to Capture Progress	1. SFEP staff work with IC and partners to capture additional areas of progress 2. Improved areas captured in Blueprint Action Status Reports
5	Low	-Look into Pacific Herring Fisheries Mgmt Plan and how it could help with this action -Confirm or look into other areas of progress	Improve Reporting to Capture Progress	1. SFEP staff work with IC and partners to capture additional areas of progress 2. Improved areas captured in Blueprint Action Status Reports
10	Medium	-Check progress on Task 10-2 - may not be accurately reported (check w/ USFWS) -Look for additional partners to advance tasks	Improve Reporting to Capture Progress	1. SFEP staff work with IC and partners to capture additional areas of progress 2. Improved areas captured in Blueprint Action Status Reports
18	Medium	-Task 18-2 could be accomplished by sharing the 2019 State of the Estuary Report with the State Water Resources Control Board -Task 18-3 could be considered complete if: --We consider recent coverage of the topic by PPIC, CA Water Blog, Delta Stewardship Council, Marin IJ article on State of the Estuary Report --We look to or include EBMUD's newer messaging on flows on their website and partnership with The Nature Conservancy (also a possible example for how to message on this complex topic) --Delta Stewardship Council also updating their Ecosystem Amendment, which will be considering climate change and flows; the Delta Plan Interagency Implementation Committee (DPIIC) is discussing the VSAs, the Biological Objectives (need to take into consideration climate change), and WQCP and there are not many public venues for these discussions.	Improve Reporting to Capture Progress	1. SFEP staff work with IC and partners to capture additional areas of progress 2. Improved areas captured in Blueprint Action Status Reports
21	High	-Task 21-1-DWR does have a program and model that will be fed to water users/providers to inform other programs. Get more info/clarification from DWR -Task 21-1 and/or Task 21-2 - DWR is supposed to be doing this using remote sensing analysis - informing municipalities (or water agencies?) what target should be -Task 21-3 - Expand progress to include other programs besides ReScape -Task 21-4 - Intent seems to be pilot through municipalities. BAWSCA may be a resource - municipal actions needs to be better recognized and tracked -AB 1668 targets small water suppliers and rural communities for implementing something similar to water shortage plans in UWMPs, and also includes ag water suppliers in requirements for updating WMPs -Next CCMP update should include the water quality connection on this task and invasive species management	Improve Reporting to Capture Progress	1. SFEP staff work with IC and partners to capture additional areas of progress 2. Improved areas captured in Blueprint Action Status Reports

## November 6 2019 IC Strategic Planning Workshop - Outcomes and Next Steps

Blueprint Action #	Staff Priority	Workshop Outcomes/Recommendations	Outcome Category	Recommended Next Steps
30	Medium	<ul style="list-style-type: none"> <li>-On track in Bay, Delta catching up</li> <li>-Related to homeless population issue</li> <li>-Task 30-1 - language could be changed to track bans, not just EPR</li> <li>-Keep track of pending legislation</li> <li>-How to incorporate citizen science (example, Napa RCD does citizen science data management)</li> <li>-Next CCMP Update: incorporate trash indicator in SOTER</li> </ul>	Improve Reporting to Capture Progress	<ol style="list-style-type: none"> <li>1. SFEP staff work with IC and partners to capture additional areas of progress</li> <li>2. Improved areas captured in Blueprint Action Status Reports</li> </ol>
28	Medium	<ul style="list-style-type: none"> <li>-This is an issue in Bay and Delta - can bring Delta in more now that more progress is being made</li> <li>-Problem with milestones: when are Tasks 28-1 and 28-2 considered done?</li> <li>-Need to secure additional funding</li> <li>-Improve tracking of funding going to address issue</li> </ul>	Improve Reporting to Capture Progress Strategy for Completion	<ol style="list-style-type: none"> <li>1. SFEP staff work with IC and partners to capture additional areas of progress</li> <li>2. Improved areas captured in Blueprint Action Status Reports</li> <li>3. SFEP staff work with IC and partners to pursue suggested strategies (resource contingent)</li> <li>4. Bring to IC for discussion as needed</li> </ol>
20	High	<ul style="list-style-type: none"> <li>-Task 20-1 - maybe UC Davis study by Prof Sandoval might be an acceptable standin. Review study and share other recent research that might be considered to fulfill this task</li> <li>-Task 20-2 - Consider convening RCD as a forum, tech transfer. Consider revising milestone to be the forum. Consider Napa RCD or RCDs in general as owners of task (decide later). Explore whether there is an existing RCD forum where this would fit. Something similar to Working Lands Forum at SOE? CARCD annual meeting?</li> </ul>	Improve Reporting to Capture Progress Revise Milestones to Achieve Intent	<ol style="list-style-type: none"> <li>1. SFEP staff work with IC and partners to capture additional areas of progress</li> <li>2. Improved areas captured in Blueprint Action Status Reports</li> <li>3. Avoid any revisions to completed Blueprint</li> <li>4. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking</li> <li>5. Consider for next update</li> <li>6. Bring to IC for discussion as needed</li> </ol>
22	Medium	<ul style="list-style-type: none"> <li>-Downgrade priority for action to LOW</li> <li>-Both tasks can be considered more or less complete. Public acceptance of recycled water is already accomplished (Task 22-1). Bay Area One Water Network is holding regional meetings (task 22-2) to break down silos and have discussions about promoting reuse</li> <li>-Task 22-1 - split milestone of outreach into two submilestones: identify success with irrigation and identify challenges of the future. People now want access to recycled water - Task may be obsolete</li> <li>-Task 22-2 - BACWA is undertaking regional nutrient study. Task should identify all hurdles besides funding and permitting, including collaboration with water agencies and their concerns over loss of customer base, stranded assets, water transfers, government arrangements, refinery use/sector</li> <li>-Next Blueprint Update - IPR and DPR is next challenge, public education will be needed. State is now working on standards for IPR/DPR</li> </ul>	Improve Reporting to Capture Progress Revise Milestones to Achieve Intent	<ol style="list-style-type: none"> <li>1. SFEP staff work with IC and partners to capture additional areas of progress</li> <li>2. Improved areas captured in Blueprint Action Status Reports</li> <li>3. Avoid any revisions to completed Blueprint</li> <li>4. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking</li> <li>5. Consider for next update</li> <li>6. Bring to IC for discussion as needed</li> </ol>

## November 6 2019 IC Strategic Planning Workshop - Outcomes and Next Steps

Blueprint Action #	Staff Priority	Workshop Outcomes/Recommendations	Outcome Category	Recommended Next Steps
1	High	-Skip Task 1-1 and focus on Task 1-2, than Task 1-3. -Develop Draft Watershed Selection Criteria (building on criteria that are already out there), assemble Working Group to review criteria, then select pilot watershed. Once selected, two main focus areas for assessment would be: 1) sediment supply and 2) stream temperatures.	Strategy for Completion	1. SFEP staff work with IC and partners to pursue suggested strategy (resource contingent) 2. Bring to IC for discussion as needed
7	Medium	-Find new champion for 7-2 and 7-3 which are instream habitat specific -Track upcoming release of Bay Area Open Space Council's Conservation Lands Network Report. May help advance 7-2 and 7-3 and will likely guide what the SFBJV's Riparian Subcommittee might look like. -Compile list of identified priority watersheds -Increase SFBJV capacity to track 7-4 (riparian acreage restored) -Check Eco-Atlas for Delta restoration acreages (tracked for Conservancy-funded projects)	Strategy for completion	1. SFEP staff work with IC and partners to pursue suggested strategy (resource contingent) 2. Bring to IC for discussion as needed
9	Medium	-Develop a full understanding of where we are, and create a workgroup to discuss Task 9-2 and 9-3 -Consider if other invasives need to be added -Task 9-4 - identify if other species that should be included in target (ex, lepidium)	Strategy for completion	1. SFEP staff work with IC and partners to pursue suggested strategies (resource contingent) 2. Bring to IC for discussion as needed
13	Medium	-Task 13-4 - Analyze SFEI's sediment reports when complete (summer 2020) and then decide if we need to either adapt an existing tool (such as project tracker, eco-atlas, sedimatch) or consider adding another tool. Sandy beach restoration projects in Aramburu and Encinal - determine any needed additional pilot efforts	Strategy for Completion	1. SFEP staff work with IC and partners to pursue suggested strategy (resource contingent) 2. Bring to IC for discussion as needed
2	Medium	-Task 2-1 - Amend milestone to "hold initial meeting of the SF Bay Steering Committee." Also discussed amending language of task to show focus of WRMP on ambient condition and tracking project success. -Task 2-4 - Amend milestone to "establish the benchmark site network (also known as the sentinel marsh monitoring network" and add some descriptive text that defines the benchmark network -Task 2-5 - Amend milestone to "convene stakeholders to ID objectives and prioritites to establish a stream guage network"	Revise Milestones to Achieve Intent	1. Avoid any revisions to completed Blueprint 2. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking 3. Consider for next update 4. Bring to IC for discussion as needed
3	Medium	-Expand milestones to encompass areas of progress beyond acreage (such as funding, regulatory improvements, plans)	Revise Milestones to Achieve Intent	1. Avoid any revisions to completed Blueprint 2. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking 3. Consider for next update 4. Bring to IC for discussion as needed

## November 6 2019 IC Strategic Planning Workshop - Outcomes and Next Steps

Blueprint Action #	Staff Priority	Workshop Outcomes/Recommendations	Outcome Category	Recommended Next Steps
8	High	-Do not pursue advancing Task 8-1 -Refocus on seasonal wetlands (as opposed to only vernal pools), and how grazing fits in. Integrate grazing BMPs -Task 8-3 - revise milestone to workshops (2-4 workshops devoted to BMPs, work with RCDs)	Revise Milestones to Achieve Intent	1. Avoid any revisions to completed Blueprint 2. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking 3. Consider for next update 4. Bring to IC for discussion as needed
16	High	-Consider redefining the milestone from completing 30 community plans to: have ABAG (and collaborate with Delta counties) assess making Action 16 a major priority issue, determine how many Co/City hazard mitigation plans exist and how many incorporate natural resources as asset category, and explore options to provide technical assistance -Consider integrating Action into Plan Bay Area (or Implementation Plan). Consider that Plan Bay Area incorporate a policy that local Hazard Mitigation Plans integrate natural resources. Encourage Plan Bay Area to explore resources to provide technical support and funding to city/counties -Consider use of MTC/ABAG websites to show: Status, integration of natural resource protection as an asset, sources of funding, best management practices	Revise Milestones to Achieve Intent Strategy for Completion	1. Avoid any revisions to completed Blueprint 2. Capture revisions to milestones consistent with Action intent in Action Status Reports and Online Progress Tracking 3. Consider for next update 4. SFEP staff work with IC and partners to pursue suggested strategy (resource contingent) 5. Bring to IC for discussion as needed
23	Low	COG plans need more recognition of water	N/A on track	
24	Low	-Everything is going in right direction, with the MRP and green infrastructure master plans. Only obvious need is more \$ -Next CCMP update - we will have other tasks to champion	N/A on track	
25	Low	Bay RMP is lead partner, progress being made	N/A on track	
		BACWA has a white paper to focus on monitoring in effluent		
		Next CCMP Update: needs some rewriting		
26	Low	-Add State Lands Commission as owner or collaborating partner for abandoned vessels -Boating and waterways funds pumpout program - good but needs more \$\$ -Next CCMP Update: add task on flushable wipes, address overlap with homeless population	N/A on track	
31	Low	-DSC has a list of additional funding for the planning and implementation of recreation projects -Connect progress of work in Bay and Delta	N/A on track	
6	Low	NOT REVIEWED
